Youth, Faith, and Artificial Intelligence Zaremohzzabieh, Zeinab, Abdullah, Rusli, Al-Issa, Riyad Salim, Ahrari, Seyedali, 2025-08-29

As AI continues to reshape society, its intersection with the younger generation and faith has presented opportunities and ethical questions. For the youth navigating their beliefs and identity has become increasingly difficult in this modern world. AI can serve as a tool and a hindrance to spiritual exploration and a challenge to traditional values. Faith communities in turn are grappling with how to engage youth meaningfully in an era shaped by algorithms, virtual interactions, and machine learning. *Youth, Faith, and Artificial Intelligence* explores the rapid advancement of AI and its impact on the way we interact with the youth. This book examines how theological perspectives can help youth navigate the complexities of an AI-driven society. Covering topics such as AI, youth, and engagement, this book is an excellent resource for sociologists, researchers, academicians, educators, and more.

An Insight into China-US Competition in the Field of Artificial Intelligence Sana Gul, 2022-01-10 Examination

Thesis from the year 2021 in the subject Computer Sciences Artificial Intelligence grade 3 77 University of Peshawar course BS International Relations language English abstract Artificial intelligence has recently emerged as a new subject of international competitiveness. In the realm of artificial intelligence, both United States and China are world leaders. The struggle between both the countries in AI will heighten mutual mistrust, accelerate the artificial intelligence arms race, and endanger geopolitical stability. This research looks at how both nations are progressing in many sectors of artificial intelligence and how Beijing is challenging America. However, there remains a gap between them in terms of artificial intelligence advancement. In the race for artificial intelligence supremacy, the United States is losing ground to China because

of no long term strategy The study examines the prospect that artificial intelligence might have an impact on the two nations national security as well as substantial alterations in the future power structures of the US and China Still China may become an emerging global power and it is using artificial intelligence to elevate its position by sidelining the United States

The Independent ,1910 The Dynamic Structure of Everyday Life Philip Agre,Massachusetts Institute of Technology. Artificial Intelligence Laboratory,1988 A running argument means continually redeciding what to do Continually redeciding what to do is more flexible than executing a plan because it is more responsive to opportunities and contingencies It is possible to approximate the ideal of continual redecision because life is wholly a routine The routine portion of the reasoning leading to each moment s action can be implemented very efficiently by recording the reasons behind any novel bits of reasoning a method known as dependency maintenance A computer program called the running argument illustrates this point **Computers and Artificial Intelligence** ,1996 Artificial Intelligence, Simulation, and Modeling Lawrence E. Widman,Kenneth A. Loparo,Norman Nielson,1989-09-06 This interdisciplinary approach to computer modeling addresses both traditional simulationists seeking the greater representational flexibility and ease of use that AI techniques offer and computer scientists seeking the greater power and realism that rigorous simulation techniques can provide First section reveals the theoretical underpinnings of AI and simulation Second section describes application of simulation techniques to current problems in AI research Third section discusses application of AI methods to simulation **Storage and Retrieval**

for Media Databases ,2001 AI IN EVERYDAY LIFE: TRANSFORMING SOCIETY Dr. Abhinandan Singh Dandotiya,Dr. Shashi Kant Gupta,Dr. Nidhi Dandotiya,Mr. Palash Sharma,2024-09-18 Artificial Intelligence AI has rapidly woven itself into the fabric of everyday life transforming how society operates in profound ways Its integration into various aspects of daily routines has led to increased efficiency and convenience from personalized recommendations on streaming platforms to automated customer service AI s ability to analyze vast amounts of data and learn from it has enabled more intelligent decision making processes enhancing productivity across industries This technological advancement has also facilitated the development of smart homes and cities where AI driven systems manage everything from energy consumption to traffic flow creating environments that are more responsive to human needs Beyond convenience AI is reshaping the workforce and education requiring societies to adapt to new modes of work and learning Automation is taking over repetitive tasks freeing up human workers to focus on more complex and creative endeavors However this shift also raises concerns about job displacement and the need for reskilling In education AI driven personalized learning systems are providing tailored educational experiences helping to bridge gaps in knowledge and cater to individual learning styles These changes are

prompting a reevaluation of traditional educational models and career paths highlighting the need for continuous learning and adaptability On a broader scale AI is playing a critical role in addressing global challenges such as climate change healthcare and resource management In healthcare AI powered diagnostic tools are improving the accuracy and speed of disease detection leading to better patient outcomes In environmental management AI is being used to monitor and predict environmental changes aiding in the development of sustainable practices As AI continues to evolve its impact on society will only deepen presenting both opportunities and challenges that require careful consideration and responsible governance to ensure that its benefits are equitably distributed *Encyclopedia of Artificial Intelligence* Stuart C.
