regarding the potential threats associated with Bitcoin citing it being used for criminal purposes and the currency's extreme volatility. Several nations such as China have banned using and creating Bitcoin. Despite the difficulties it has faced, Bitcoin has kept going. The initial concept has given rise to a novel crypto industry that now boasts an estimated value of over one trillion dollars. Given its market capitalization, Bitcoin has become one of the most valuable assets globally. No longer do people discuss whether Bitcoin will still exist tomorrow. Today, legislators are discussing regulating the cryptocurrency industry to maximize returns. *Understanding Digital Signatures* Gail L. Grant, 1998. This volume explains the technology behind digital signatures and key infrastructures PKI. These are the standards that make it absolutely safe to buy, sell, sign documents and exchange sensitive financial data on the Internet. *Sociological Abstracts* Leo P. Chall, 2002. CSA Sociological Abstracts abstracts and indexes the international literature in sociology and related disciplines in the social and behavioral sciences. The database provides abstracts of journal articles and citations to book reviews drawn from over 1 800 serials publications and also provides abstracts of books, book chapters, dissertations and conference papers. *NFT related art and the concept of the artist in a historical perspective* Lisa Wolf, 2024-01-17. Bachelor Thesis from the year 2023 in the subject Art History of Art grade 1.7. LMU Munich Kunstgeschichte language English abstract. Since 2021, NFTs (non-fungible tokens) have conquered the public and the art world with headlines found its way into international headlines. The sale of *Everydays* The First 5000 Days has made Beeple the third most valuable living artist behind Jeff Koons and David Hockney, displacing Gerhard Richter from the Top 3. Kolja Reichert, art critic and curator, critically questions in one of his articles the most expensive illustrator and thereby points to a significant problem. The crypto market, originally part of online trading, had until then mainly dealt with sports trading cards, fan merchandise and products from the gaming industry. With the entry of NFTs into the traditional auction system, the collective name NFT art has formed without quality standards, entry barriers or criticism. Based on this problem, this Bachelor thesis deals with the overarching question of what makes an NFT creator an artist and how does this concept of an artist relate to historical concepts of artists. To answer these questions, case studies of two NFTs will be conducted. While their producers have very different artistic backgrounds, both NFTs were auctioned at renowned auction houses in 2021. Starting from the overarching question, these two examples will be used to examine whether the work can be related to historical concepts of artists to what extent NFT technology has created a new concept of the artist and if there are features outside of NFT technology that connect these two artworks. *The Australian Computer Journal*, 1980. **Blockchain Success Stories** John Hargrave, Evan Karnoupakis, 2020-12-08. Urban Affairs Abstracts, 1994. Bitcoin, Blockchain, and FinTech Samuel Fosso Wamba, 2018. This paper aims to bridge the knowledge gap in existing literature on Bitcoin, Blockchain and FinTech. It begins by clarifying the definition of these concepts. Through a systematic review and case studies in the supply chain industry, this paper brings out the applications, the benefits, value and the challenges issues of Bitcoin, Blockchain and FinTech in several industries. It also presents the research methodologies approaches used during such research. The classification framework developed and used to perform an analysis of 141 articles from five top academic databases serves as a baseline study. It offers the opportunity to evaluate the level of knowledge on Bitcoin, Blockchain and Fintech and their evolution over time. The findings show that these technologies are evolving and organizations are embracing them for competitive advantage. Thus, organizations need to leverage research on these technologies to better understand them, optimize their business strategies and develop critical insights for decision making.
