**A Scientific Bibliography of the Drakensberg, Maloti and Adjacent Lowlands** Rodney Moffett, 2021-04-19 This bibliography includes scientific articles on the Drakensberg Maloti and Adjacent Lowlands published between 1808 and 2019. Although focussing on material appearing in accredited journals, there is such a wealth of information in the form of unpublished yet traceable reports, documents, presentations and dissertations, these are also included. The bibliography has two parts: a complete list arranged alphabetically and the same references arranged in 33 different disciplines. These range from Palaeobotany with 17 entries to Rock Art with 502 entries. *The 2015 Regional Forecast and Urban Development Patterns* Sonny Conder, 1964

**Biotraffic** Christopher Morris, 2024-10-15 Biotraffic explores the complex world of biological resource trade. It takes readers inside the contemporary Ciskei region of South Africa, a once notorious apartheid homeland turned extractive hub for wild medicinal plants. Drawing from in-depth ethnographic and archival research, Christopher Morris examines the region's trade in *Pelargonium sidoides*, a plant once contested as a tuberculosis treatment in early twentieth-century Europe and now an internationally marketed remedy for the common cold. The story of this trade links past and present, encapsulating a larger tale about colonial legacies and their intersection with global environmental governance ambitions. It also teems with a diverse cast of actors, from plant harvesters and pharmaceutical companies to activist NGOs and the chiefs who have become business partners with multinational drug firms. The book's analysis extends beyond considering merely the extraction and commercialization of plant resources and offers a critical examination of how demand for therapeutics intertwines with broader struggles over land and political power in South Africa. Biotraffic illuminates how a distance-defying trade is reshaping the sociopolitical landscape of a region grappling with apartheid's afterlives and the challenges of environmental and economic justice. *Bulletin of the National Library of South Africa*, 2015

**Self-Devouring Growth** Julie Livingston, 2019-09-20 Under capitalism, economic growth is seen as the key to collective well-being. In *Self-Devouring Growth*, Julie Livingston upends this notion, showing that while consumption-driven growth may seem to benefit a particular locale, it produces a number of unacknowledged negative consequences that ripple throughout the wider world. Structuring the book as a parable in which the example of Botswana has lessons for the rest of the globe, Livingston shows how fundamental needs for water, food, and transportation become harnessed to what she calls self-devouring growth: an unchecked and unsustainable global pursuit of economic growth that threatens catastrophic environmental destruction. As Livingston notes, improved technology alone cannot stave off such destruction; what is required is a greater accounting of the web of relationships between humans, nonhuman beings, plants, and minerals that growth entails. Livingston contends that by failing to understand these relationships and the consequences of self-devouring growth, we may be unknowingly consuming our future. *Dictionary Catalog of the Department Library* United States.
