Technology Transfer and Economic Growth in Sub-Sahara African Countries Nathaniel O. Agola, 2016-03-21 This book provides a pragmatic analytical model grounded on the solid idea that technologies and the accompanying implementation efforts only make sense if they are successfully deployed in markets The analytical model also provides an exhaustive analysis of all critical variables at the global regional and national levels which contribute to failure or success of technology transfer efforts The model is validated by an incisive analysis of technology transfer experiences of Japan Korea Singapore Taiwan province of China and Malaysia While this book finds that these East Asian countries have had both diverging and converging models and experiences with technology transfer the enduring and fundamental aspects of technology transfer in specific industrial sectors and economic growth in these countries is then used to draw lessons for African countries This book therefore is a timely and compelling piece of research work that provides valuable answers to the increasingly urgent question of how African countries can industrialize through technology transfer to meet their economic development and growth ideals

Cemeterians Jack W. Plunkett, 2008 Franklin Jack Marla Thadius and Caitlin this unlikely group of assorted misfits are the Cemeterians a group that will take on any job no really we mean any bloody job money s a bit tight right now Trudge through disgusting sewers to battle manatee massacring mermaids and soggy cultists creep through creepy fog littered cemeteries straight out of an ancient Hammer Film soundstage confront undead lecherous lodgers and other assorted beasts creepies and ghoulies It all comes down to whether an adolescent giant Automaton a truly mad Mad Scientist a surly Necromancer a Banshee s granddaughter and a reluctant furry monster straight from under your little sister s bed can manage not to kill each other or at least quit fighting over the tele privilege schedule long enough to get the job done Not likely

Facets of Competitiveness Ashish Lall, 2011 The ten countries in the ASEAN region account for approximately 5% of world gross domestic product and 8% of world population and represent the most diverse group of nations in terms of the level of prosperity political system culture language and history This diversity in ASEAN not only helps us understand the notion of national competitiveness but also provides important policy lessons for both developed and developing countries This book a collection of essays provides insights on competitiveness challenges and policies It provides an excellent overview of competitiveness for a group of countries at various stages of development Written in a simple and accessible manner this book will be of interest to students researchers business executives and government officials

How Asia Got Rich Edith Terry, 2015-05-20 Within a few short months in 1997 Asian economies that had been considered not only healthy but miraculous suddenly fell off a precipice as

investors withdrew massively first from Asian currencies and in rapid order from equity markets across the region On October 27 1997 the turmoil in Asian markets spooked Wall Street in the largest single day decline in history a drop of 550 points It was predicted that the Asian crash could drive the US trade deficit from 191 billion to 300 billion by 1998 creating huge new tensions in relations with some of the largest US trading partners These wrenching changes following a generation of success raise numerous questions about the steps that led to the crisis its likely outcome and the limits and constraints of Asian capitalism Edith Terry presents a blow by blow account of the crisis beginning with the 1996 collapse of the Bangkok Bank of Commerce In her overview she links the fall of the Asian miracle with the theme of globalization arguing that the crisis demonstrates the urgency of dismantling restraints to trade investment and financial services and that the United States should take leadership in pushing for new and sweeping reform through the World Trade Organization and in bilateral negotiations with its trading partners The final section of the book deals with the rise of the Asian miracle how the myth was created who created it why it succeeded for so long and is informed by analysis of the Japanese prototype
