HCI has a vital role to play in these new worlds to ensure that people using the new technologies are empowered rather than subjugated to the technology that they increasingly have to use In addition outcomes from HCI research studies over the past 20 years are now finding their way into many organisations and helping to improve and enhance work practices These factors have strongly influenced the INTERACT 97 Committee when creating the conference programme with the result that besides the more traditional HCI research and education focus found in previous INTERACT conferences one strand of the 1997 conference has been devoted to industry and another to multimedia The growth in the IFIP TC13 committee itself reflects the expansion of HCI into new worlds Membership of IFIP TC13 has risen to now include representatives of 24 IFIP member country societies from many parts of the world In 1997 IFIP TC13 breaks new ground by holding its sixth INTERACT conference in the Asia Pacific region This is a significant departure from previous INTERACT conferences that were all held in Europe and is especially important for the Asia Pacific region as HCI expands beyond its traditional base Local Authority Performance Indicators, 1995/96 Audit Commission for Local Authorities and the National Health Service in England and Wales, 1997 Journal of Production Agriculture, 1993 Production oriented information for professional agriculturists Local Authority Performance Indicators 1998/99 Audit Commission for Local Authorities and the National Health Service in England and Wales, 2000 **Proceedings of the Institution of Civil Engineers**, 1992 Traffic Engineering & Control, 1998 Seeing Beneath the Soil Oliver Anthony Clark, Anthony Clark, 2003-09-02 Scientific soil prospecting methods can give dramatic pictures of buried archaeological sites and sometimes information on what occurred within them before any earth has been removed Dr Clark who was one of the earliest to work in this field has written the first general survey of an increasingly important area of practical archaeology The emphasis is on the principles and practical application of the well established techniques of resistivity magnetometry and magnetic susceptibility with shorter sections on emerging and less common techniques such as ground penetrating radar electromagnetic methods and phosphate survey This paperback edition updates and enhances the earlier book adding new material such as the large scale evaluation exercises now required as a precondition of planning consent for major developments PC, 1987
