

PROVAPE

PROVARI RADIUS

Owner's Manual

Rev. 8.25.103

Thank you for purchasing a ProVape Radius personal vaporizer.
We hope you get many years of enjoyment from this device.

www.ProVape.com

Introduction

A personal vaporizer (PV) is a battery-powered device that provides inhaled doses of nicotine by way of a vaporized solution. In addition to the nicotine delivery, this vapor also provides a flavor and physical sensation similar to that of inhaled tobacco smoke. Vaporizers do not contain tar and have just a few ingredients compared to several thousand found in traditional cigarettes. There is no tobacco or combustion involved in its operation. There is no ash and no smell. Vaping is the 21st century alternative to smoking tobacco products. Just please keep in mind that personal vaporizers are not meant to be a smoking cessation device. This device can also be used without nicotine.

The ProVape Radius featuring the ProVape Radius chip is a powerful microprocessor controlled PV that lets you adjust and fine tune the device to your exact preferences by adjusting the wattage, along with a number of other parameters which we will explain later in this manual. The ProVape Radius uses the latest technology to bring you some new and exciting features. The ProVape Radius has regulated power output which keeps the wattage the same with each puff regardless of your remaining battery power. As the battery drains, the device will keep the power output consistent, giving you the perfect vapor all day long. Now you can dial-in the perfect settings for your tank or atomizer and e-liquid!

(Please note that due to ongoing software updates, improvements and changes based on customer feedback, some of the features or screen images shown in this manual may be slightly different)
