## MEMORANDUM

From: J.E. Fletcher  
Environment & Waterways Branch Chief, CG RDC

To: COMDT (CG-652)  
COMDT (CG-761)

Subj: COMPLETION OF RDC PRODUCT "TECHNICAL INPUTS TO NATIONAL MARINE ELECTRONIC ASSOCIATION (NMEA) 2000 & ONENET STANDARDS AND 0183 STANDARD" (2419) (UDI 1452)

1. The United States Coast Guard (USCG) Research and Development Center (RDC) is pleased to provide notification of technical inputs to National Marine Electronic Association (NMEA) 2000, NMEA OneNet, and NMEA 0183 Standards. Following is a brief introduction to each of the NMEA standards:

The NMEA 2000 standard contains the requirements of a serial data communications network to interconnect marine electronic equipment on vessels. It describes a low cost moderate capacity bi-directional, multi-transmitter/multi-receiver instrument network to interconnect marine electronic devices. It is multi-master and self-configuring, and there is no central network controller. The network design is based on existing Controller Area Network (CAN) technology. This standard is the only open non-proprietary marine real-time network standard available today and is referenced by International Electrotechnical Commission (IEC) in the IEC 61162-3 standard. NMEA 2000 and NMEA OneNet use the same set of NMEA Network Messages, also referred to as Parameter Group Numbers (PGN). The USCG has now begun implementing NMEA 2000 networks on USCG vessels.

The NMEA OneNet standard contains the requirements of Internet Protocol (IP) networking to interconnect marine electronic equipment on both vessels and shore. NMEA OneNet is being designed based on IPv6 and to provide a common and non-proprietary Ethernet solution. Like NMEA 0183, OneNet will be suitable for both shipboard and shore based application. This standard is expected to be published by NMEA in 2015. The primary goals of OneNet are:

- To allow transport of NMEA 2000 Network Messages over IP in a standardized manner.
- To complement and interoperate with the established industry standard NMEA 2000 Network.
- To establish standardized Gateway rules between NMEA 2000 and OneNet.
- To support high bandwidth applications such as video data transport (which is not possible with the NMEA 2000 Network).

## September 2014 Memorandum

**Fiona de Londras, Josephine Doody**

## September 2014 Memorandum:

**Accountability in the Economic and Monetary Union** Menelaos Markakis,2020-04-02 Following the financial and public debt crisis the EU's Economic and Monetary Union EMU has been under intense political scrutiny. The measures adopted in response to the crisis have granted additional powers to the EU and national authorities the exercise of which can have massive implications for the economies of the Member States financial institutions and of course citizens. The following questions arise: how can we hold accountable those institutions that are exercising power at the national and EU level? What is the appropriate level type and degree of accountability and transparency that should be involved in the development of the EU's governance structures in the areas of fiscal and economic governance and the Banking Union? What is the role of parliaments and courts in holding those institutions accountable for the exercise of their duties? Is the revised EMU framework democratically legitimate? How can we bridge the gap between the citizens and the institutions that represent them and those institutions that are making these important decisions in the field of economic and monetary policy? This book principally examines the mechanisms for political and legal accountability in the EMU and the Banking Union. It examines the implications that the reforms of EU economic governance have had for the locus and strength of executive power in the Union as well as the role of parliaments and other political fora and courts in holding the institutions acting in this area accountable for the exercise of their tasks. It further sets out several proposals regarding transparency, accountability and legitimacy in the EMU

**William Watson Cheyne and the Advancement of Bacteriology** Charles DePaolo,2016-10-03

William Watson Cheyne 1852-1932 a surgeon by training and a student of Joseph Lister was a prominent British bacteriologist who published 60 papers and 13 monographs from 1879 to 1927. A proponent of the idea that bacteriology and medicine were interdependent disciplines he investigated the causes and treatment of wound infections, tuberculosis, cholera, tetanus and gangrene. In 1897 he organized an historical outline of 19th century bacteriology in five landmark periods of discovery each defined by the work of an influential figure. This study documents his contributions to the history of microbiology and describes his activities as a laboratory investigator, clinician, surgeon, translator, editor and educator.
