Eloise Carr, Mandy Layzell, Martin Christensen, 2009-12-21 This book showcases the development and evaluation of innovative examples of pain management initiatives by advanced practitioners. It considers each service development or community initiative both in terms of advanced practice nursing and pain management. There is a wide range of examples of innovation in pain management included from the introduction of ketamine use in one trust to wider issues around meeting the needs of pain management in the community. The book considers issues including use of research education and interprofessional working in the advanced practitioner role. Each chapter looks at development of the service, challenges of implementation, evaluation of the service's success and justifying the importance of the advanced nurse in the service's achievements. Underlying theory is considered but the focus of each chapter is the translation of knowledge and skills into practice. Written by expert advanced nurse practitioners with a wealth of experience in pain management. Explores pain management in primary and secondary care both within and outside the NHS. Suitable for qualified nurses, Nurse Practitioners, specialist nurses working in the pain field and nursing students on postgraduate courses on pain management.

Pain Management in Nursing Practice Shelagh Wright, 2014-12-08 Pain is a challenging area to understand for any healthcare professional and quality training on the subject is required if nurses are to provide effective pain management and person-centred care. Based on the curriculum developed by the International Association for the Study of Pain, this book offers an essential guide to managing pain. Beginning with an examination of the biology of pain, it then goes on to consider pain management across the life course, looking at key topics including acute pain, cancer pain and pharmacology. Case scenarios are included throughout the book to help readers apply the knowledge they have learned to their own practice. This book is aimed primarily at meeting the learning needs of undergraduate nurses and is essential reading for all healthcare professionals studying pain. The text will be helpful as a basic foundation for more advanced postgraduate courses in pain management in nursing practice. *Recommendations for Nursing Practice in Pain Management* Pain Society.
