## Primer Time Travel Paradox:

**Space Oddities** Marie Lathers, 2012-05-03 A fascinating new perspective on the Space Race combining brilliant film scholarship with gender studies and feminist theory    **Making Sense of Mind-Game Films** Simin Nina Littschwager, 2019-06-27 Mind game films and other complex narratives have been a prominent phenomenon of the cinematic landscape during the period 1990-2010 when films like The Sixth Sense, Memento, Fight Club, and Source Code became critical and commercial successes often acquiring a cult status with audiences. With their multiple story lines, unreliable narrators, ambiguous twist endings, and paradoxical worlds, these films challenge traditional ways of narrative comprehension and in many cases require and reward multiple viewings. But how can we make sense of films that don't always make sense the way we are used to? While most scholarship has treated these complex films as narrative puzzles that audiences solve with their cognitive skills, **Making Sense of Mind Game Films** offers a fresh perspective by suggesting that they appeal to the body and the senses in equal measures. Mind game films tell stories about crises between body, mind, and world, and about embodied forms of knowing and subjective ways of being in the world. Through compelling in-depth case studies of popular mind game films, the book explores how these complex narratives take their embodied spectators with them into such crises. The puzzling effect generated by these films stems from a conflict between what we think and what we experience, between what we know and what we feel to be true, and between what we see and what we sense.    **Impossible Puzzle Films** Miklos Kiss, 2017-04-28 Narrative complexity is a trend in contemporary cinema. Since the late 1990s, there has been a palpable increase in complex storytelling in movies. But how and why do complex movies create perplexity and confusion? How do we engage with these challenges? And what makes complex stories so attractive? By blending film studies, narrative theory, and cognitive sciences, Kiss and Wilemsen look into the relation between complex storytelling and the mind. Analysing the effects that different complex narratives have on viewers, the book addresses how films like *Donnie Darko*, *Mulholland Drive*, and *Primer* strategically create complexity and confusion using the specific category of the impossible puzzle film to examine movies that use baffling paradoxes, impossible loops, and unresolved ambiguities in their stories and storytelling. By looking at how these films play on our mind's blind spots, this innovative book explains their viewing effects in terms of the mental state of cognitive dissonance that they evoke.    **Genesis Prime** Gary W. Babb, 2024-09-25 The arduous 200-light-year space journey from a destroyed Earth is finally over. Now Captain Nick Johns and the crew of the spaceship *Genesis* must carve out space on a new world to colonize. Unfortunately, their new home planet *Genesis Prime* is already inhabited by three sentient races, one of which is human, transplanted from Earth in the 3rd Century BC by aliens needing slave labor. Captain Johns and his crew liberate the enslaved humans and capture the aliens ruling over them. The human slaves still lived in the 3rd Century culture and viewed the humans of the *Genesis* as Olympian gods, actually believing Captain Johns was the Olympian god Zeus. During the liberation, they also captured the alien technology, which was far more advanced than anything known on Earth.

advanced than that of the Genesis Eventually they befriend the few remaining aliens and learn the secrets of their technology one of which is a Plasma Bubble that can transport matter through time and space They use this technology to free the last remaining almost extinct aliens from their home world In doing so the Genesis attracts the attention of the alien s adversaries that were waging genocide against them These adversaries now turn their war upon the Genesis colony Battles rage against these vicious attacking aliens until the Genesis must face the most ruthless and dangerous race yet the Human Race Captain johns learns with absolute certainty that humans can not be trusted to govern themselves Humans by their very nature are self destructive and given enough time they will destroy themselves The hardest battles came from within the Human Race and its inherent treachery
