present **Oxford Textbook of Community Mental Health** Graham Thornicroft, Robert E. Drake, Oye Gureje, Kim T. Mueser, George Szmukler, 2025-01-03 Community mental health has evolved as a field of practice and as a research discipline during the last 50 years. Now newer concepts such as shared decision making, the recovery approach, evidence based practice, implementation science, telemedicine and mobile device technology are adding layers of texture to this domain. These developments require an ever more sophisticated understanding of the very latest evidence and experience in community mental health care to respond to the values, goals, needs and preferences of people with lived experience of mental health conditions. This second edition of the Oxford Textbook of Community Mental Health addresses recent changes and achievements, current controversies and future challenges while emphasizing areas of convergence where social values, health, medical sciences and policy formation converge and meet. This edition also features a new section on global mental health to emphasize what is known about the mental health gap in low and middle income countries and the evidence of how to respond to these huge global challenges. Like community mental health care itself, the authors are multidisciplinary, international and bring both clinical and scientific perspectives to this volume. This textbook will be an invaluable and authoritative source of reference for all mental health specialists, for people with mental health conditions, for staff in non-governmental and governmental organizations and indeed for all who are dedicated to creating better mental health services and systems.

of Frankfurt Main IEAS course The Memoir Boom Literary Cultural and Social Perspectives language English abstract All auto biographies and memoirs have one thing in common they are usually written in the retrospective way meaning that even if they read chronologically forward they are composed essentially backward Louis Menand in Smith and Watson In life writing the term memoir is complex to define since it has different definitions depending on various contexts The term memoir derives from the French word for memory which implies that it could be written in a subjective and impressionistic rather than a factual and strongly evident way A memoir can neither be fiction nor a novel since the memoir genre tries to depict the ultimate truth and the real life of the author the first person narrator or other individuals Nonetheless nowadays memoirs can also include invented or enhanced materials or novelistic techniques as embellishments because they are a form of literary art Couser It is often hard to distinguish between memoirs or factual writing and fiction because many works are paradoxically hybrid forms of both of the literary types and additionally fiction often pretends to be factual and to depict the real world Furthermore the term memoir is often used as a synonym of autobiography even though it is only a subgenre of autobiography because the memoir must not be about the author him or herself whereas biography can be about anyone who has ever existed memoir can only concern someone known to and remembered by the author It will be or resemble reminiscence consisting of personal recollection Couser Memoirs in direct comparison to autobiographies generally tend to be more concise selective and focused According to G Thomas Couser what differentiates life writing from the real life is that life is long multidimensional and complex sometimes chaotic and life writing must have form and focus Life inevitably far exceeds the capacity of writing to contain it Even though the memoir genre and especially its flourishing in the United States of America and Great Britain is a patriarchy product it strengthened feminism and allowed women to speak publicly in form of a written and published book a typical memoir Often the memoirs of female writers report about traumatic periods in their life such as abuse or violence The Making of a Terrorist: Training James J.
