Transformative Management Education Ulrike Landfester, Jörg Metelmann, 2018-12-07 Due to the recent global financial crises academic business schools have come in for much criticism having in the eyes of the public failed in their responsibility to society by teaching future managers only how to increase their personal gain without any consideration as to their actions social and cultural consequences Realising that there is a pressing need to innovate their educational offers accordingly business schools are beginning to turn to the humanities and social sciences to improve on the understanding and thus the teaching of management This book is the result of an empirical study conducted at eight academic business schools that either already practise or are beginning to practise linking management education to the humanities and social sciences Gathered mostly in interviews our research team conducted during site visits to these schools the material presented shows three major fields of concern how to shift the focus from instrumental to transformative learning how to reframe the concept of disciplinary subject matter towards a more relational understanding of knowledge especially in the light of the impact digitalisation is having on education and how to address the organisational as well as the political consequences of management education turning towards the inclusion of the humanities and social sciences strategically The findings indicate that the humanities and social sciences indeed offer knowledge which can significantly help management education with meeting the challenges of the twenty first century Innovating management education by making it part of its program portfolios proves a challenge in and of itself in the face of a university system which still determinedly clings to

disciplinary segregation Reforming management education towards an engagement with fields of knowledge traditionally at best ignored and at worst vilified as being completely useless in the real world may therefore place academic business schools at the forefront of a movement that is beginning to reshape the educational landscape as a whole This book will be of value to researchers academics and students in the fields of business management studies organisational studies and education studies

Boosting Productivity in Kazakhstan with Micro-Level Tools Mariana Iooty, Asset Bizhan, Paulo Correa, 2023-01-10 Like many other countries Kazakhstan's economic growth has slowed since the 2007-09 global financial crisis Although the slowdown reflected weaknesses in expanding labor and capital the most striking reduction has been in productivity growth In more recent years total factor productivity growth has started to bounce back albeit at a modest pace possibly driven by the recovery in commodity prices Although slower expansion in productivity has been a global phenomenon Kazakhstan's subdued productivity performance for a decade reflects more structural problems Against this backdrop Boosting Productivity in Kazakhstan with Micro Level Tools Analysis and Policy Lessons examines barriers and policy gaps that hinder productivity growth in Kazakhstan The detailed analysis is uniquely based on first time access to administrative firm level data the data for the period of 2009-18 covered 70 000 business establishments annually corresponding to total employment

of 1.6 million people. The unprecedented access to firm level data deepened the understanding of the microeconomic dynamics and drivers of aggregate productivity growth and enabled identification of a wide ranging set of policy recommendations to boost aggregate productivity growth. *Business Plan 2025* Dragos Bogdan, 2024-12-29 Unlock Your Business Potential with a Strategic Plan for 2025 Whether you're starting your first business or refining your startup model *Business Plan 2025* offers essential tools to grow smart, scale fast and thrive in a competitive market.
