Burgmann, 2020 This is a timely comprehensive and thoroughly researched study of climate fiction from around the world including novels short stories films and other formats Informed by a sociological perspective it will be an invaluable resource for students and scholars looking to enter and expand the field of climate fiction studies      **Loosed Upon the World** John Joseph Adams, 2015-09-15 An anthology of twenty six short stories exploring the future of climate change and its effects on life on Earth includes contributions from Margaret Atwood Paolo Bacigalupi and Kim Stanley Robinson      **Fire and Snow** Marc DiPaolo, 2018-07-11 Fellow Inklings J R R Tolkien and C S Lewis may have belonged to different branches of Christianity but they both made use of a faith based environmentalist ethic to counter the mid twentieth century s triple threats of fascism utilitarianism and industrial capitalism In *Fire and Snow* Marc DiPaolo explores how the apocalyptic fantasy tropes and Christian environmental ethics of the Middle earth and Narnia sagas have been adapted by a variety of recent writers and filmmakers of climate fiction a growing literary and cinematic genre that grapples with the real world concerns of climate change endless wars and fascism as well as the role religion plays in easing or escalating these apocalyptic level crises Among the many other well known climate fiction narratives examined in these pages are *Game of Thrones* *The Hunger Games* *The Handmaid s Tale* *Mad Max* and *Doctor Who* Although the authors of these works stake out ideological territory that differs from Tolkien s and Lewis s DiPaolo argues that they nevertheless mirror their predecessors ecological concerns The Christians Jews atheists and agnostics who penned these works agree that we all need to put aside our cultural differences and transcend our personal socioeconomic circumstances to work together to save the environment Taken together these works of climate fiction model various ways in which a deep ecological solidarity might be achieved across a broad ideological and cultural spectrum This book is freely available in an open access edition thanks to Knowledge Unlatched an initiative that provides libraries and institutions with a centralized platform to support OA collections and from leading publishing houses and OA initiatives Learn more at the Knowledge Unlatched website at <https://www.knowledgeunlatched.org> and access the book online at the SUNY Open Access Repository at <http://hdl.handle.net/20.500.12648/7137>      Our Shared Storm Andrew Dana Hudson, 2022-04-05 Through speculative fiction five interlocking novelettes explore the possible realities of our climate future What is the future of our climate Given that our summers now regularly feature Arctic heat waves and wildfire blood skies polar vortex winters that reach all the way down to Texas and 100 year storms that hit every few months it may seem that catastrophe is a done deal As grim as things are however we still have options Combining fiction and nonfiction and employing speculative tools for scholarly purposes *Our Shared Storm* explores not just one potential climate future but five possible outcomes dependent upon our actions today Written by speculative fiction writer and sustainability researcher Andrew Dana Hudson *Our Shared Storm* features five overlapping fictions to employ a futurist technique called scenarios thinking Rather than try to predict how history will unfold picking one out of

many unpredictable and contingent branching paths it instead creates a set of futures that represent major trends or counterposed possibilities based on a set of climate modeling scenarios known as the Shared Socioeconomic Pathways SSPs. The setting is the year 2054 during the Conference of the Parties global climate negotiations aka The COP in Buenos Aires, Argentina. Each story features a common cast of characters but with events unfolding differently for them and human society in each alternate universe. These five scenarios highlight the political, economic, and cultural possibilities of futures where investments in climate adaptation and mitigation promised today have been successfully completed, kicked down the road, or abandoned altogether. From harrowing to hopeful, these stories highlight the choices we must make to stabilize the planet. Our Shared Storm is an experiment in deploying practice-based research methods to explore the opportunities and challenges of using climate fiction to engage scientific and academic frameworks.

**Posthumanist Readings in Dystopian Young Adult Fiction** Jennifer Harrison, 2019-04-29. If there is one trend in children's and YA literature that seems to be enjoying a steady rise in popularity, it is the expansion of the YA dystopian genre. While the genre has been lauded for its potential to expand horizons, promote critical thinking, and foster social awareness and activism, it has also come under scrutiny for its promotion of specific ideologies and its often sensationalist approach to real-world problems. In an examination of six YA dystopian texts spanning more than twenty years of development of the genre, this book explores the way in which posthumanist ideologies, in particular, are deployed or resisted in these texts as a means of making sense of the specific challenges which young people confront in the twenty-first century.

**Fiction and the Sixth Mass Extinction** Jonathan Elmore, 2020-04-01. Fiction and the Sixth Mass Extinction is one of the first works to focus specifically on fiction's engagements with human-driven extinction. Drawing together a diverse group of scholars and approaches, this volume pairs established voices in the field with emerging scholars and traditionally recognized climate fiction cli-fi with texts and media typically not associated with Anthropocene fictions. The result is a volume that both engages with and furthers existing work on Anthropocene fiction as well as laying groundwork for the budding subfield of extinction fiction. This volume takes up the collective insistence on the centrality of story to extinction studies. In various and disparate ways, each chapter engages with the stories we tell about extinction, about the extinction of animal and plant life, and about the extinction of human life itself. Answering the call to action of extinction studies, these chapters explore what kinds of humanity caused this event and what kinds may live through it, what cultural assumptions and values led to this event and which ones could lead out of it, what relationships between human life and this planet allowed the sixth mass extinction, and what alternative relationships could be possible.

**The Ecology of American Noir** Katrina Younes, 2025-04-07. This volume investigates the relationship between the conventions of noir fiction and film and its subtypes in relation to environmental crises. Dr. Younes addresses questions that not only allow readers to re-read early hardboiled literature and neo-noir films but also help identify a new subgenre of noir and develop an ecocritical methodology, eco-noir. This text traces the development of strategies of mapping urban blight

and environmental deterioration in classic hardboiled fiction of the 1940s neo noir films of the 1970s and eco noir texts of the post millennial period Introducing the concept of eco noir as both a sub genre and fictional form as well as a methodology the volume develops a new way of understanding the relationship between noir and climate fiction texts Through a close reading of hardboiled neo noir and eco noir texts including those by Dashiell Hammett Raymond Chandler Robert Towne Kim Stanley Robinson and Jeff VanderMeer it asks and addresses the question how does each sub genre of noir map the noir atmosphere of the private investigator s natural setting in terms of environmental toxicity The Ecology of American Noir contributes to critical conversations in both noir and ecocritical scholarship making clear how a new understanding of noir as defined through environmental and atmospheric conditions invites readers viewers and scholars of the genre to generate meaningful dialogues about our decaying and deteriorating environment

### **The Noah Myth in Twenty-First-Century Cli-Fi Novels**

Helen E. Mundler,2022 With the rise of concern about global warming in recent years climate change fiction or cli fi has become increasingly important both as a publishing phenomenon and as an area of academic study and research Flood narratives have become a subsection of cli fi in their own right This book proposes new readings of four recent rewritings of the Noah myth Odds Against Tomorrow by Nathaniel Rich Margaret Atwood s Maddaddam trilogy When the Floods Came by Clare Morrall and The Flood by Maggie Gee Helen E Mundler s book takes into account the wealth of criticism that has appeared on these texts in recent years acknowledging important contributions from critics including Adam Trexler Adeline Johns Putra and Astrid Bracke However her book s strength is that it takes a new approach going beyond the topicality of the texts and treating them not just as ideological statements but giving them their due as literary artifacts While the importance of climate change is beyond debate this book takes a more balanced approach that places it within a wider context of the multiple crises of the Anthropocene
