**Architecture Framework TOGAF Version 9** The Open Group, 2015-01-01 The Open Group Architecture Framework TOGAF is a framework, a detailed method, and a set of supporting tools for developing an enterprise architecture developed by members of The Open Group Architecture Forum [www.opengroup.org/architecture](http://www.opengroup.org/architecture). As a comprehensive open method for enterprise architecture, TOGAF Version 9 complements and can be used in conjunction with other frameworks that are more focused on specific aspects of architecture or for vertical sectors such as Government, Defense, and Finance. TOGAF may be used freely by any organization wishing to develop an enterprise architecture for use within that organization, subject to the Conditions of Use. This book is divided into seven main parts: PART I Introduction. This part provides a high level introduction to the key concepts of enterprise architecture and, in particular, the TOGAF approach. It contains the definitions of terms used throughout TOGAF and release notes detailing the changes between this version and the previous version of TOGAF. PART II Architecture Development Method. This is the core of TOGAF. It describes the TOGAF Architecture Development Method (ADM), a step-by-step approach to developing an enterprise architecture. PART III ADM Guidelines Techniques. This part contains a collection of guidelines and techniques available for use in applying TOGAF and the TOGAF ADM. PART IV Architecture Content Framework. This part describes the TOGAF content framework, including a structured metamodel for architectural artifacts, the use of reusable architecture building blocks, and an overview of typical architecture deliverables. PART V Enterprise Continuum Tools. This part discusses appropriate taxonomies and tools to categorize and store the outputs of architecture activity within an enterprise. PART VI TOGAF Reference Models. This part provides a selection of architectural reference models which includes the TOGAF Foundation Architecture and the Integrated Information Infrastructure Reference Model (II RM). PART VII Architecture Capability Framework.
