Mental Illness Bob Bennett, 2006-08-30 Mental Illness A Guide to Recovery gives you information gleaned from many sources which can help you learn to recover. Coping skills needed to deal with the illness can be developed. Materials which can help you reduce symptoms are presented. Recovery does not happen overnight but step by step most can make significant recovery. Humpty Dumpty had a great fall and all the king's horses and all the king's men couldn't put Humpty Dumpty back together again. The same holds true for those of us with a mental illness. The psychiatrists psychologists social workers etc can assist but it is up to the individual to create conditions which will allow recovery to happen. The neurobiological basis of mental illness is often presented in a fatalistic way. That's the brain chemistry you've got and that's what you're stuck with as if the individual was unable to change the chemistry inside his or her own head. Breathing changes brain chemistry. So does exercise the food you eat the words you speak the thoughts you think as well as how often you smile. While drugs are capable of making radical changes in the chemistry of the brain it is the slow changes over time which will help most in recovery. Thorough and informative without being technical fascinating very enlightening. *Psychiatric Rehabilitation Journal* Vol 28 No 4 Spring 2005 You have made a complex issue easier to understand. Chief Kathryn Landreth Las Vegas Metropolitan Police
