**Components in the Electricity Balance Area Management** Andrei Gladikov, 2019-05-15 Master's Thesis from the year 2019 in the subject Energy Sciences grade 1.8 University of Freiburg language English abstract This thesis is aimed to estimate the severity of recent balancing costs fallen onto balancing responsible parties BRPs the quality of forecast incentive and prove a blockchain based secondary flexibility market with quota mechanism of trading activation rights an efficient and economically viable tool for BRPs for offsetting schedule deviations at short notice After developing a prosumer enabled model which is system integrated complying with existing balancing management various scenarios of deviations exchange are emulated The focus of this work is set to justify the sufficiency of strategic value in blockchain technology as the market underlying infrastructure and as a complementary layer for the established data exchange platform This thesis identifies blockchain benefits and regulatory challenges for synchronization of multiple flexibility providers creating and managing deviations conscious balancer communities resulting in energy balancing costs reduction enabling innovative business models and additional revenue streams for balancing groups The increasing uncertainty of the power supply in Germany due to the surge in fluctuating renewable energy power plant failures and accidental changes in consumption lead to the energy system imbalance This not only threatens the system security but also turns into financially punitive consequences for energy market players Current market based solutions and the German established data exchange platform with market rules MaBiS do not foster a bottom up collaboration in balancing groups to timely offset schedule deviations The capability to modify and or shift consumption of industrial or commercial end customers as well as to adjust energy output of generation units gives a unique opportunity for organizing a shared platform for flexibility services exchange to mitigate the risk of paying imbalance tariff

### **The rise of non-fungible tokens (NFTs) in fashion and luxury**

Laura Schneider, 2022-11-21 Master's Thesis from the year 2022 in the subject Business economics Miscellaneous grade 7.8 Bocconi University Department of Management and Technology course M.Sc. International Management language English abstract The concept of the metaverse and non fungible tokens has become ubiquitous and fashion and luxury companies are faced with the need to define a thorough strategy to tackle its business impact Despite some brands acting at the forefront of NFT adoption the utility of the infant technology remains unclear By conducting a 2x2 factorial design experiment this research creates insights into guidelines for NFT strategies for fashion and luxury companies First the high importance of connecting NFT offers with experiences is confirmed Second a coherence of values between NFT technology and the luxury industry was illustrated Finally the experiment suggested a high difference in perceived utility of real world asset NFTs and digital asset NFTs for mainstream brands while the difference could not be proven in the case of luxury companies In conclusion the NFT strategy matrix was developed which introduces four dimensions of brand loyalty brand collectors brand enthusiasts and brand curious differentiated by their brand loyalty and desired NFT utility This framework aims to provide a

tool for fashion and luxury companies to cater their holistic NFT offering to different customer groups In general it is advisable to move from digital asset NFTs toward real world asset NFTs in order to engage consumers with rare experiences in a virtual or physical setting and deploy the technology as an experiential marketing tool

**The Metaverse in Marketing and Sales. Fields of Application in the B2B Sector** Jakob Ramsenthaler,2023-09-06 Master s Thesis from the year 2022 in the subject Business economics Offline Marketing and Online Marketing grade 1 3 University of Bamberg Lehrstuhl f r Vertrieb und Marketing language English abstract The present work addresses the following questions What is the Metaverse and to what extent can it expand and optimize business activities in marketing and sales How will its development look and what opportunities and risks arise from participating in it With the renaming of the Facebook conglomerate to Meta in 2021 CEO Mark Zuckerberg promotes the idea of the Metaverse Popular media and public discourse have recently generated extensive interest as strong emotions are associated with this futuristic technology and various visions of its future appearance have been put forth There are

indications that a new digital revolution similar to the introduction of the internet is on the horizon. However, to reach that point, several technological, societal, and regulatory stages need to be overcome. The topic has also gained traction in the marketer world. When you ask marketers today how they keep up with the digital transformation in their companies, the term Metaverse will be mentioned. However, at this moment, it is not definitively determined how it will be precisely defined and to what extent it will influence business activities. To gain a competitive advantage, companies primarily in the B2C sector are already venturing into the Metaverse and exploring this novel technology. By entering this new market early, brands can convey an innovative image and offer customers a unique shopping experience. Various application possibilities also exist for the B2B sector. The Metaverse could be used for various activities such as meetings and events, maintaining customer relationships, hybrid selling, innovative marketing, Smart Contracts, and also serving as an advertising platform.

**Neoliberalism and the Rise of Bitcoin** Michelle Trauth, 2018-09-20 Research Paper postgraduate from the year 2018 in the subject Sociology Individual Groups Society grade 75 Distinction Bournemouth University language English abstract

By the end of 2017, almost everybody has heard of Bitcoin. Therefore, the topic of this essay is highly relevant and aims to give an insight on Bitcoin and Blockchain technology as well as analyze the rise of Bitcoin from a socio-economic viewpoint. By applying the personal enterprise concept based on the neo-liberal definition from Dardot and Laval 2013, this essay will look at the correlation between the increase of neoliberalism and the rise of Bitcoin. By highlighting the sociological and financial circumstance that Bitcoin has emerged from, the rise of Bitcoin can be explained. This essay will show how decentralization, the financial crisis of 2008, globalization, digitization, and the neo-liberal mindset are the main factors that paved the way for Bitcoin and contributed to its development. The essay will also look at the societal changes that occurred due to digitization to demonstrate why Bitcoin and Altcoins are increasingly popular in today's network societies.
