## Chapter 1: Introduction to Social Psychology

Neil Bauman – why do people go to great lengths to help complete strangers?

Jean-Francois Caudron – why did he want to be apart of a hockey team that hazed him? -how could large numbers of people be induced to kill their children and themselves in Quebec,

Switzerland, and France? What is Social Psychology

- Social Psychology: the scientific study of the way in which people's thoughts, feelings, and behaviors are influence by the real of imagined presence of other people
- Social psychologists are interested in studying how and why our thoughts, feelings, and behaviors are shaped by the entire social environment
- Experiment based science – we test our assumptions and ideas about human social behavior empirically and systematically

### The Power of Social Interpretation

- Construal – the way in which people perceive, comprehend, and interpret the social world

### The Role of Construal in Conflict Negotiations

- Lee Ross calls a special kind of construal "naïve realism"
- Naïve realism: the conviction all of us have that we perceive things "as they really are" – we assume that other reasonable people see things the way we do

### What Social Psychology is Not (science, and common sense)

- Social psychologists address many of the same questions that philosophers address, but we attempt to look at these questions scientifically

### Social Psychology vs. Sociology

- Different levels of analysis
- Social psychology is a branch of psych, rooted in the study of individuals, with an emphasis on the psychological processes going on in their hearts and minds – the level of analysis is the individual in the context of a social situation
- Sociology is more concerned with broad societal factors that influence events in society (social class, social structure, societal institutions)
- The goal of social psychology is to identify universal properties of human nature that make everyone susceptible to social influence, regardless of social class or culture

### Social Psychology vs. Personality Psych

- Personality psychologists generally focus their attention on **individual differences**: the aspects of people's personalities that make them different from other people

**An Introduction to Social Psychology** Luther Lee Bernard, 1926 The present Introduction to Social Psychology represents an attempt at a more synthetic type of treatment of the field than has ordinarily been given It seems to the writer that the time has arrived when schools of social psychology may properly be regarded as obsolete and the subject as a whole may be presented systematically In a sense social psychology overlaps a very large portion of social science and of psychology and education In this respect it is central to all psychological and social science disciplines This fact necessarily renders the content of social psychology voluminous It is no longer possible to treat this subject adequately in small compass The text books which have so far appeared although for the most part excellent from their several viewpoints are nevertheless but partial treatments So notably true is this that there exists a marked controversy as to what properly constitutes social psychology In Part I of this volume an attempt has been made to bring this controversy into relief for the purpose of enabling the reader to see the subject as a whole Originally the writer intended to publish this volume in five parts to make the synthetic treatment more pronounced But the length of the volume as thus planned was prohibitive and it was decided to change the plan somewhat The synthetic character of the treatment has been retained but the detailed presentation of the process of the development of personality and of self and social consciousness has been reserved for a second volume The present volume treats the subject from the standpoint of the more objective factors which integrate the personality and its responses in a social environment Throughout it has been the intention of the writer not only to make the treatment complete in itself but to keep the presentation on such a level that the volume can be used successfully as a second book in social theory following directly upon the introductory course in sociology in departments sociology If the approach to the social sciences is a psychological one the organization of this volume should make it available as an introduction to the first course in sociology economics politics and more advanced courses in history and literature in those departments which care to use it in this way That social psychology will ultimately be regarded as a necessary introduction to the several social sciences and the literatures can scarcely be doubted While the present volume is intended for undergraduate students it is hoped that it may also be used profitably in more advanced courses in combination with the more extended treatment of the subjective aspects of personality development later to be published Preface PsycINFO Database Record c 2006 APA all rights reserved
