[Chinese Migrants and Africa's Development](#) Doctor Ben Lampert,Doctor May Tan-Mullins,Daphne Chang,Giles Mohan,2014-06-12 China's recent stepping up of relations with Africa is one of the most significant developments on the African continent for decades For some it promises an end to Africa's dependent aid relationships as the Chinese bring expertise technology and a stronger business focus But for others it is no more than a new form of imperialism This book is the first to systematically study the motivations relationships and impact of this migration It focuses not just on the Chinese migrants but also on the perceptions of and linkages to their African hosts By studying this everyday interaction we get a much richer picture of whether this is South South cooperation as political leaders would have us believe or a more complex relationship that can both compromise and encourage African development

**Socio-Metabolic Perspectives on the Sustainability of Local Food Systems** Eva Fraňková,Willi Haas,Simron J. Singh,2018-01-09 This book delves into diverse local food systems and critically assesses their ecological and societal benefits and trade offs their limits and opportunities for improving sustainability of food production and framework conditions which either hinder or promote their development More and more people with gradually meat heavier diets will demand growth in food production whilst our increasingly industrialized and globalized agri food system

has already caused serious sustainability problems in the past. This calls for a change in the way we produce, distribute and consume food. A re-emerging debate on food security and food sovereignty seems to support this quest. But what are the promising alternatives to mainstream developments? Such a discussion regarding sustainability of local food systems requires a sound systemic understanding and thus invites a socio metabolic reading of local cases by analyzing the nexus between material and energy flows as well as land and time use. This approach is needed to complement the so far mostly qualitatively based local food studies. Applying socio metabolic approaches to local food systems fosters a better understanding of promises and pitfalls for sustainable pathways in the future.
