ignorance They do not know because they have never been taught Some crowds believe that the emotionally intelligent are as smart as those with high IQ's People in positions of leadership show a higher aptitude of EI for being able to help others to calm the crowd and to work well under pressure without cracking Each of the four branches of the emotional intelligence theory is explained in full detail The first branch is emotional perception The second branch is emotional reasoning The third branch is emotional understanding and the fourth branch is emotional management Each branch has an explanation on how to do it how to perceive how to reason how to understand and how to manage the emotions In leaning this we can then learn how to improve emotional intelligence Emotional intelligence training helps to make leaders out of people and helps people to learn more about themselves and they will learn how to handle their emotions A person with a high level of emotional intelligence has learned how to control their reaction to their emotions and they can also help others with their responses to emotions The emotional intelligence definition shows that we are whole people who have emotions and will go through emotional times but that we can control our reaction and responses to these emotions instead of allowing the emotions to show as raw and out of control

get this Amazon bestseller for just 2.99 Regularly priced at 4.99 Read on your PC Mac smart phone tablet or Kindle device In its simplest and most concise form emotional intelligence referred to emotional intelligence as EI or emotional quotient as EQ is the ability to identify, use, understand and manage your own emotions in positive ways to relieve stress, communicate effectively, empathize with others, overcome challenges and defuse conflict. This ability also allows us to recognize and understand what others are experiencing emotionally. This recognition and understanding is for the most part a nonverbal process that informs thinking and influences how well you connect with others. Emotional intelligence differs from how we think of intellectual ability in that emotional intelligence is a learned not acquired. This learning can take place at any time in life so the social and emotional skill set known as emotional intelligence is something we can all have. People who are considered to have high EI can solve a variety of emotion related problems accurately and quickly. They can correctly perceive emotions in faces of others and what the emotions convey. For instance they know that angry people can be dangerous, happy people want to relate with others and sad people often prefer to be alone. High EI people are also adept at managing their own as well as others emotions. They know how to use emotional episodes in their own lives to promote specific types of thinking. Solving problems requires less cognitive effort for those with a high EI. These individuals also tend to be higher in verbal, social and other intelligences. They are generally more open and agreeable and are drawn to occupations involving social interactions such as teaching, counseling and interacting with others.
