**Towards Evidence-based Policy for Canadian Education** John Deutsch Institute for the Study of Economic Policy, Statistics Canada, 2002 Evidence is increasingly being demanded before education policy in Canada is developed. Unfortunately all too often education research and policy proposals come from relatively isolated perspectives. This volume arose from a project that brought together a diverse group of stakeholders as part of an ongoing effort to improve communications between relevant groups. The authors focus on aspects of evidenced based decision making for education in the Canadian context providing both survey articles and commentary. Topics include new and innovative provincial initiatives such as la carte de la d favorisation au Qu bec and the Alberta Initiative for School Improvement AISI. Major Canadian large scale testing initiatives including the Third International Math and Science Survey TIMSS, the national Student Achievement Indicators Program SAIP and provincial testing programs are discussed and selected studies resulting from these programs are presented. Also included are overviews of currently relevant issues such as male female differences in test scores, high school exit exams, the causal impact of education on social assistance use and long term labour market outcomes, teacher evaluations at universities and the optimal level of investment in education from an economic perspective. Contributors are from university education faculties and economics departments, provincial government ministries of education and related agencies, school boards and other related organizations such as the Canadian Teachers Federation, the Council of Ministers of Education, Conseil Sup rieur de l ducation au Qu bec and Statistics Canada. Reflecting Canada portions of the book are in French and others are in English.
