

## **Career Goals Scholarship Essay Example**

My name is Abigail Lopez. I am a student at Southeastern College completing an associate's degree in science and planning on transferring to a four-year college or university. My educational aspirations consist of acquiring a bachelor's degree in any biological or health science that would assist me in pursuing a medical career as a doctor. On the other hand, my career vision is to one day be able to provide affordable health care to marginalized communities in the United States. However, I am certain that if I do not complete my college degree I could never have the opportunity to achieve my career goals.

I decided that I will attain a career as a doctor since my passion has always been assisting others and trying to improve their quality of life. Therefore, I think that pursuing such a career will provide me the opportunity to help improve the community's health quality conditions and learn about their medical needs. After becoming a certified doctor, I want to specialize in oncology, the study of cancer, and add my knowledge to the cancer research field.

Furthermore, I want to contribute back to underserved populations in the U.S. that struggle every day to sustain a family, and who do not have as much access to medical assistance as other privileged groups. The first health project I want to accomplish throughout my career as a doctor is to establish a free clinic where affordable medical assistance can be provided regardless of the patient's immigration status. The diverse health services would include free doctor consultations, low-price or free medication, and nutritional classes to prevent the presence of diabetes or heart disease. I also intend to provide an interpreter for patients in case they do not speak English and establish a financial assistance program to help patients who are not able to pay for any type of surgery that needs to be performed.

The second biggest career goal that I want to accomplish is to establish a non-profit organization where I can create internships for medical school students around the U.S., and allow them to travel to isolated communities around the world to provide free medical services. I also want to provide nutrition education to support these marginalized communities, especially indigenous groups from Latin American countries. This will help contribute to the physical development of kids and offer a solution to malnutrition.
