

General Student Growth Objectives

Setting the Standard for "Full Attainment" of the Student Growth Objective

In order to develop a scoring guide based on how well you meet your SGO, determine the following:

- a target score on the final assessment that indicates considerable learning;
- the number of students that could reasonably meet this mark;
- the percentage of students in the course that this represents; and
- a 10-15 percent range around this number.

For example, you and your evaluator may decide that 80% on a challenging assessment indicates considerable learning. Based on an initial evaluation of the 65 students in your course, your evaluator agrees with the assessment that about 50 of them could reasonably make this score at the end of the year. This is 77 percent of the students. You make 70-84 percent the range around this number. This means that if between 46 and 55 of students (70-84 percent of them) score at least 80% on the final assessment, you would have fully met the objective. This is shown in Figure 4 on page 16.

Setting Other Standards of Attainment

Once a range is established for "full attainment," subtracting 10-15 percent from the lower range of "full attainment" will produce the "partial attainment" category. Any number below this range is the "insufficient attainment" category. Above the high end of the "full attainment" range is the "exceptional attainment" range. These ranges are summarized below in Figure 5 where 15 percent margins were used to set the ranges.

Target Score	Attainment Level in Meeting Student Growth Objective			
80% or Higher on Final Assessment	Exceptional 4	Full 3	Partial 2	Insufficient 1
Number of Students Meeting Target (out of 65)	More than 55	46-55	36-44	Fewer than 36
Percent of Students Meeting Target	Greater than 84%	70-84%	55-69%	Less than 55%
