Facilitating Learning with the Adult Brain in Mind Kathleen Taylor, Catherine Marienau, 2016-02-09

Practical brain aware facilitation tailored to the adult brain. *Facilitating Learning with the Adult Brain in Mind* explains how the brain works and how to help adults learn, develop, and perform more effectively in various settings. Recent neurobiological discoveries have challenged long held assumptions that logical, rational thought is the preeminent approach to knowing. Rather, feelings and emotions are essential for meaningful learning to occur in the embodied brain. Using stories, metaphors, and engaging illustrations to illuminate technical ideas, Taylor and Marienau synthesize relevant trends in neuroscience, cognitive science, and philosophy of mind. Readers unfamiliar with current brain discoveries will enjoy an informative, easy to read book. Neuroscience fans will find additional material designed to supplement their knowledge. Many popular publications on brain and learning focus on school aged learners or tend more toward anatomical description than practical application. This book provides facilitators of
