Standards in the Classroom Richard H. Audet, Linda K. Jordan, 2002-11-20 The standards movement offers great promise for strengthening American education however its success will depend upon how the standards affect classroom practice Standards in the Classroom provides an excellent set of strategies to assist teachers in this critical task Audet and Jordan have written a clear guide for making standards work in science and math education Larry Wakeford Clinical Professor of Biology Science Education Brown University Studying Audet and Jordan's book before I developed my biology and chemistry curricula allowed a more thorough understanding of state adopted standards and how I can help all students meet them Dale Rudolph High School Biology and Chemistry Teacher Clarksville High School TN In my work with teachers and teaching fellows I have found no better method for enhancing understanding of the importance of standards and their implementation into content lessons than this book Vicki Metzgar Coordinator NSF Grade K 12 Teaching Fellows Vanderbilt University Medical Center Discover how to effectively integrate standards based reform into the curriculum Standards have been executed at the national state district and school levels Teachers however have not received the support needed to effectively implement them into their classrooms Now professional educators and authors Richard H Audet and Linda K Jordan have designed a much needed unique guide that gives educators the tools for understanding today's standards and aligning them with their curriculum and instruction While primarily targeting math and science this book allows teachers to adapt its contents to any subject while proceeding at their own timetable and pace Clearly written practical and easy to use the book provides the missing link in standards based reform Comprehensive in its coverage of topics related to standards the book is a valuable resource for both preservice and practicing teachers A full range of issues and topics are presented in this guide including Understanding the principles of teacher change and teaching and learning in a constructivist environment Using national standards resources to better understand state and local standards Developing performance assessments linked to standards and using them to direct the selection of curriculum materials Mapping a curriculum by using principles in the guide Understanding the standards based reform movement Standards in the Classroom is organized around a five stage learning cycle that models good teaching instruction It applies an interactive approach that incorporates follow up reflections questionnaires surveys inventories and rubrics to help users monitor their progress towards mastery of key concepts and applications This guide is an absolute must for teachers administrators and professors to provide the support needed to effectively implement standards in the classroom

Is Conflict Adaptation an Illusion? James R Schmidt, Wim Notebaert, Eva Van Den Bussche, 2015-05-20 Conflict adaptation theory is one of the most popular theories in cognitive psychology The theory argues that participants strategically modulate attention away from distracting stimulus features in response to conflict Although results with proportion congruent sequential congruency and similar paradigms seem consistent with the conflict adaptation view some researchers have expressed scepticism The paradigms used in the study of conflict adaptation require the manipulation of stimulus frequencies sequential dependencies time on task regularities and various other task regularities that introduce the potential for learning of conflict unrelated information This results in the unintentional confounding of measures of conflict adaptation with simpler learning and memory biases There are also alternative accounts which propose that attentional adaptation does occur but via different mechanisms such as valence expectancy or effort A significant and often heated debate remains surrounding the question of whether conflict adaptation exists independent of these alternative mechanisms of action The aim of this Research Topic is to provide a forum for current directions in this area considering perspectives from all sides of the debate
