Included in this paper would be what my values are the sources that shaped my values, and the criteria and decision-making factors I make the most of to revise them. Finally I will discuss the potential impact of my values and performance in the workplace. What are personal values? Included are many definitions out there that can define values and how they can relate to ones personal beliefs. My definition would be what I believe and what I am against. My personal value is that I believe that I should provide a quality of life suitable for my family.

I believe that spending the most time with my family is important. I believe that a job should let one work from home. How did I develop these types of values? I believe I learned them from growing up in a family oriented home. I had a mother that stayed home and a father that worked. How can I develop and improve values? By living and learning is a way to develop better values. I believe that a person can develop more and improve his or hers values by experiencing what is right or wrong and how someone handles those situations. Developing ground rules in relation to values and ethics are important. Rules can provide a path or guideline to be able to improve and develop more positive values. Rules can also enhance the ethical development that can be learned.

My rules would include if the values help me improve personally and professionally, and stick with the values. If the behavior is something I am against then I must understand why I am against the behavior. I believe that rules are important and should be followed which can help better shape someone's values. Ethics is defined as "a system of moral principles and the rules of conduct recognized in respect to a particular class of human actions or a particular group, culture, etc." Values and ethics are varying much are intertwining with each other.

Ethics is a much bigger then just values. Ethics is a system of all the values and principles. How can I develop ethics? This question is hard to find an answer to right now. My answer would be I believe I would interconnect all my values and rules that I know to develop the ethics that are who I am.

I believe my development of ethics has just started by understanding what ethics are and understanding what are my values. Let's return to the first part of this paper when I explained a few of my values. What are my values? My values are that family comes first, and provide a lifestyle suitable as explained earlier. My values are more to my life then just that.

Values are what make who I am special and different. I bel-

A New Writing Classroom Patrick Sullivan, 2014-07-15 In A New Writing Classroom Patrick Sullivan provides a new generation of teachers a means and a rationale to reconceive their approach to teaching writing calling into question the discipline's dependence on argument. Including secondary writing teachers within his purview, Sullivan advocates a more diverse, exploratory and flexible approach to writing activities in grades six through thirteen. A New Writing Classroom encourages teachers to pay more attention to research in learning theory, transfer of learning, international models for nurturing excellence in the classroom, and recent work in listening to teach students the sort of dialogic stance that leads to higher order thinking and more sophisticated communication. The conventional argumentative essay is often a simplistic form of argument widely believed to be the most appropriate type of writing in English classes, but other kinds of writing may be more valuable to students and offer more important kinds of cognitive challenges. Focusing on listening and dispositions or habits of mind as central elements of this new composition pedagogy, A New Writing Classroom draws not just on composition studies but also on cognitive psychology, philosophy, learning theory, literature, and history, making an exciting and significant contribution to the field.
