Personal Philosophy Nursing:

Personal Philosophy and Disciplinary Perspective of Nursing Mona Alaanzi, 2016-11-17 Essay aus dem Jahr 2016 im Fachbereich Pflegewissenschaft Pflegemanagement Sprache Deutsch Abstract Gaining more experience and knowledge in philosophy nursing philosophy and the nursing paradigm has helped me to know more about myself as a human being and as a nurse In the process of reading I find it hard to commit to one point of view or one perspective however now I clearly see where I fit My philosophical perspective in general and in nursing specifically are heavily influenced by the empiricism and positivism perspective and ultimately aligns with the totality nursing paradigm From my ontological perspective in general I believe in objectivism that there is a single truth and there is a single reality I believe that we as human beings are always in interaction with the external reality which is the environment I believe that the environment is everything surrounding us and we as human beings interact with and influence the environment and the environment interacts with and influences us in turn In other words if someone follows a certain action he she will be able to predict what the outcomes will be To illustrate if I throw a ball up in the air I expect that it will hit the ground Another example could be if I follow a specific diet and a specific exercise to lose weight then the result will be what I expected which is weight loss unless there are some other contributing factors From my epistemological standpoint I believe that reality can be captured by senses and can be predicted by experience I believe that there is no knowledge without experience To illustrate if someone says an apple is red I can't imagine what the apple looks like if I have never seen a red one before How can one know what something tastes like if they have never tasted it Experience is anything that came across our mind at any certain time in the past I also believe that knowledge can be gained through reasoning According to wisdom in my culture The reason is known the surprise is blown In other words knowledge needs clarifications and explanation so only reasoning can transform sensory data into something meaningful and understandable

legal issues the healthcare delivery system and future directions Cover p 4 **The Practical, Moral, and Personal Sense of Nursing** Anne H. Bishop, John R. Scudder Jr., 1990-07-05 The Practical Moral and Personal Sense of Nursing is the first explicitly philosophical articulation in English of the essence of nursing from a phenomenological perspective. The authors interpret nursing as competencies and excellences that are exercised in an in between situation characteristic of nursing practice the practical sense which fosters the well being of patients the moral sense within the nurse patient relationship the personal sense This directly challenges the current tendency to reconstruct nursing by using theories drawn from the behavioral and natural sciences and shows why nursing must be reformed from within. Bishop and Scudder stress the use of phenomenology to articulate an actual practice showing the unique capacity of phenomenology to illuminate actual situations and to generate fresh understandings of old problems Textbook of Communication and Education Technology for Nurses
