Alien Invasion Fiction Blueprint:

Science Fiction Film Keith M. Johnston, 2013-05-09 Science Fiction Film develops a historical and cultural approach to the genre that moves beyond close readings of iconography and formal conventions. It explores how this increasingly influential genre has been constructed from disparate elements into a hybrid genre. Science Fiction Film goes beyond a textual exploration of these films to place them within a larger network of influences that includes studio politics and promotional discourses. The book also challenges the perceived limits of the genre. It includes a wide range of films from canonical SF such as *Le voyage dans la lune*, *Star Wars* and *Blade Runner* to films that stretch and reshape the definition of the genre. This expansion of generic focus offers an innovative approach for students and fans of science fiction alike.

Creators of Science Fiction Brian Stableford, 2009-11-01 Well known critic and novelist Brian Stableford here discusses the writers, editors, and publishers who helped create the modern genre of science fiction. Heinlein, James Blish, Gregory Benford, and Ian Watson. Complete with bibliography and index.

[How Literary Worlds Are Shaped](#) Bo Pettersson, 2016-09-12 Literary studies still lack an extensive comparative analysis of different kinds of literature including ancient and non-Western. [How Literary Worlds Are Shaped: A Comparative Poetics of Literary Imagination](#) aims to provide such a study. Literature it claims is based on individual and shared human imagination which creates literary worlds that blend the real and the fantastic. Mimesis and genre often modulated by different kinds of unreliability. The main building blocks of literary worlds are their oral, visual, and written modes and three themes challenge perception and relation. They are blended and inflected in different ways by combinations of narratives and figures, indirection, thwarted aspirations, meta usages, hypothetical action, as well as hierarchies and blends of genres and text types. Moreover, literary worlds are not only constructed by humans but also shape their lives and reinforce their sense of wonder. Finally, ten reasons are given in order to show how this comparative view can be of use in literary studies. In sum, [How Literary Worlds Are Shaped](#) is the first study to present a wide ranging and detailed comparative account of the makings of literary worlds.
