## **Prospective Et Sciencefiction:**

**Prospective et science-fiction** Thomas Michaud, 2011-01-01 La science fiction est souvent utilisée pour décrire le futur. Elle participe à la création de la prospective depuis de nombreuses années principalement dans les pays de l'Empire nucléaire qui développent un imaginaire planificateur assurant le déploiement de projets technologiques très ambitieux diffusés par la suite sur toute la planète. La science fiction devient de plus en plus importante dans la réflexion stratégique et mobilise de plus en plus d'acteurs chargés de l'intégrer correctement dans le discours des entreprises.

**Science Fiction and Indian Women Writers** Urvashi Kulkarni, 2021-07-29 Science fiction as a literature of fantasy goes beyond the mundane to ask the question what if the world were different from the way it is. It often challenges the real, builds on imagination, places no limits on human capacities and encourages readers to think outside their social and cultural conditioning. This book presents a systematic study of Indian women's science fiction. It offers a critical analysis of the works of four female Indian writers of science fiction: Rokeya Sakhawat Hossain, Manjula Padmanabhan, Priya Sarukkai Chabria and Vandana Singh. The author considers not only the evolution of science fiction writing in India but also discusses the use of innovations and unique themes including science fiction in different Indian languages, the literary, political and educational activism of the women writers, and eco-feminism and the idea of cloning in writing to argue that this genre could be viewed as a vibrant representation of freedom of expression and radical literature. This ground-breaking volume will be useful for scholars and researchers of English literature. It will also prove a very useful source for further studies into Indian literature, science and technology studies, women's and gender studies, comparative literature and cultural studies.

**Human Technological Enhancement and Theological Anthropology** Victoria Lorrimer, 2022-05-05 A cross-disciplinary theological engagement with proposals for the technological enhancement of humans including radical life extension, mind uploading, mood enhancement and moral enhancement. This work draws on metaphor studies, cognitive sciences and literary studies to develop an account of human creativity in relation to divine creativity.

**Contemporary French Science Fiction (1950-1980) : a Literature of Crisis** Vivian V. Lehmann, 2002  
*Poli Sci Fi* Michael A. Allen, Justin S. Vaughn, 2016-03-10  
*Poli Sci Fi* An Introduction to Political Science through Science Fiction allows readers, students and instructors to explore the multiple worlds of science fiction while gaining a firm grasp of core political science concepts. This carefully composed text is comprised of sixteen brief chapters, each of which takes a prominent science fiction film or television episode and uses it to explore fundamental components of political science. The book is designed to serve as a supplemental text for undergraduate political science courses, especially Introduction to Political Science. The structure and content of the volume is shaped around the organization and coverage of several leading texts in this area and includes major parts devoted to theory and epistemology, political behavior, institutions, identity, states and inter-state relations. Its emphasis on science fiction and particularly on popular movies and television programs speaks to the popularity of the genre as well as the growing

understanding that popular culture can be an extraordinarily successful vehicle for communicating difficult yet foundational concepts especially to introductory level college students

**L'imaginaire et l'organisation** Thomas Michaud, 2014-12-01

L'imaginaire joue un rôle important dans le fonctionnement des organisations. S'il contribue à stimuler la créativité et mettre en place des stratégies, il peut aussi être considéré comme un piège que les managers doivent apprendre à gérer. La gestion de l'imaginaire organisationnel est un enjeu de pouvoir. La lutte pour la domination sur les marchés ou en politique passe par le contrôle d'imaginaires en permanentes mutations.

**Unleashing the Strange** Damien Broderick, 2009-01-01

Novelist and scholar Damien Broderick offers an exhilarating report on the state of science fiction at the start of the millennium. In the 21st century we see a new wave rising in SF: its complex, transreal, slipstreamy, post-postmodern. It unleashes the strange.

**In Between** Margit Grieb, Yves-Antoine Clemmen, Will Lehman, 2019

The essays in this anthology probe and comment on the space-time issue between aesthetic or linguistic productions in a variety of cultures. For over three decades the Southeast Conference on Foreign Languages, Literatures, and Film (SCFLLF), which convenes biennially, has been and continues to be a showcase for scholarship in the Humanities with a special emphasis on non-English language area studies. In 2018 at the 23rd SCFLLF, fifty-three national and international scholars presented their research on linguistics, literature, film, culture, and language pedagogy. The essays we selected to showcase all probe and comment on the space-time issue between aesthetic or linguistic productions in a variety of cultures. We have organized these contributions in three parts: entitled Part I: Between Fiction and Reality, Part II: Between Continuity and Transformation, and Part III: Between Conformity and Resistance.

**Science-fiction Studies**, 1989

**Science Fiction and Postmodern Fiction** Barbara Puschmann-Nalenz, 1992

In the years after 1950 a new generation of authors began to expand the thematic scope of Science Fiction while also extending its narrative conventions by introducing ideas from modern psychology and surrealism. Science Fiction shares the new themes: the quest of identity, the relativity of time and consciousness, the overlapping of illusion and reality with works of modern and especially postmodern fiction. On the other hand, the innovative postmodern fiction of Pynchon, Borges, Vonnegut, and William Burroughs incorporates Science Fiction motifs, thereby blending the two genres. This book, in a series of juxtapositions and contrastive literary analyses, clarifies and questions existing genre borderlines and breaks new ground in the literary theory of postmodern fiction and of Science Fiction.

**Imagined Futures in Science, Technology and Society** Gert Verschraegen, Frédéric Vandermoere, Luc Braeckmans, Barbara Segaert, 2017-04-07

Imagining, forecasting, and predicting the future is an inextricable and increasingly important part of the present. States, organizations, and individuals almost continuously have to make decisions about future actions, financial investments, or technological innovation without much knowledge of what will exactly happen in the future. Science and technology play a crucial role in this collective attempt to make sense of the future. Technological developments such as nanotechnology, robotics, or solar energy largely shape how we dream and think about the future while economic

forecasts gene tests or climate change projections help us to make images of what may possibly occur in the future This book provides one of the first interdisciplinary assessments of how scientific and technological imaginations matter in the formation of human ecological and societal futures Rooted in different disciplines such as sociology philosophy and science and technology studies it explores how various actors such as scientists companies or states imagine the future to be and act upon that imagination Bringing together case studies from different regions around the globe including the electrification of German car infrastructure or genetically modified crops in India Imagined Futures in Science Technology and Society shows how science and technology create novel forms of imagination thereby opening horizons toward alternative futures By developing central aspects of the current debate on how scientific imagination and future making interact this timely volume provides a fresh look at the complex interrelationships between science technology and society This book will be of interest to postgraduate students interested in Science and Technology Studies History and Philosophy of Science Sociology Cultural Studies Anthropology Political Sciences Future Studies and Literary Sciences
