Protecting Yellowstone Science And The Politics Of National Park Management:

Protecting Yellowstone Michael J. Yochim, 2013-04-15 Yellowstone National Park looks like a pristine western landscape populated by its wild inhabitants bison grizzly bears and wolves But the bison do not always range freely snowmobile noise intrudes upon the park's profound winter silence and some tourist villages are located in prime grizzly bear habitat Despite these problems the National Park Service has succeeded in reintroducing wolves allowing wildfires to play their natural role in park forests and prohibiting a gold mine that would be present in other more typical western landscapes Each of these issues bison snowmobiles grizzly bears wolves fires and the New World Mine was the center of a recent policy making controversy involving federal politicians robust debate with interested stakeholders and discussions about the relevant science Yet the outcomes of the controversies varied considerably depending on politics science how well park managers allied themselves with external interests and public thinking about the effects of park proposals on their access and economies Michael Yochim examines the primary influences upon contemporary national park policy making and considers how those influences shaped or constrained the final policy In addition Yochim considers how park managers may best work within the contemporary policy making context to preserve national parks

Preserving Yellowstone's Natural Conditions James A. Pritchard, 2022-10 In this new edition James A Pritchard has added a summary of recent developments in wildlife science and management and discusses historical continuities in the role of Yellowstone Park as a wildlife refuge and conservator

Devils Hole Pupfish Kevin C. Brown, 2021-09-07 The Devils Hole pupfish is one of the rarest vertebrate animals on the planet its only natural habitat is a ten by sixty foot pool near Death Valley on the Nevada California border Isolation in Devils Hole made the fish different from its close genetic relatives but as Devils Hole Pupfish explores what has made the species a survivor is its many surprising connections to the people who have studied ignored protested or protected it

Yellowstones Survival Susan G. Clark, 2021-05-15 This book focuses on Yellowstone the park the larger ecosystem and even more so the idea of Yellowstone In presenting a case for a new conservation paradigm for the Greater Yellowstone Ecosystem GYE including Yellowstone National Park the book at its heart is about people and nature relationships This new paradigm will be truly committed to a healthy sustainable environment rich in other life forms and one that affords dignity for all humans and nonhumans The new story or paradigm must be about living such a commitment and future for GYE in real time The book presents a well developed theory for interdisciplinary problem solving that is grounded in practice

Requiem for America's Best Idea Michael J. Yochim, 2022-03-01 In his enthusiastic explorations and fervent writing Michael J Yochim was to Yellowstone what Muir was to Yosemite Other times his writing is like that of Edward Abbey full of passion for the natural world and anger at those who are abusing it writes foreword contributor William R Lowry In 2013 Yochim was diagnosed with ALS Lou Gehrig's disease While fighting the disease he wrote Requiem for America's Best Idea The book establishes a unique parallel between Yochim's personal struggle with a terminal illness and the impact climate

change is having on the national parks the treasured wilderness that he loved and to which he dedicated his life Yochim explains how climate change is already impacting the vegetation wildlife and the natural conditions in Olympic Grand Canyon Glacier Yellowstone and Yosemite National Parks A poignant and thought provoking work Requiem for America's Best Idea investigates the interactions between people and nature and the world that can inspire and destroy them Science and the Management of Protected Areas J. H. Martin Willison, 1992 As a result of the consumption of wildland by the demands of a growing world human population parks and other protected areas are becoming increasingly important The role of science in the effective management of such areas is a critical consideration if protected areas are to serve their several functions as recreational areas heritage and educational resources wildlife refuges natural repositories of endangered species reference sites for scientific research and sites set aside simply for their intrinsic natural value as wilderness In this volume strategies to combat accelerating decline in global biodiversity are put forward Legal protection requires explicit strategies for the management of natural systems such as the scientific approach to land use planning and reserve selection and design Science should play an essential role in assisting in the definition of strategic objectives and providing means for the realization of those objectives The natural systems requiring protection are dynamic and management objectives are of necessity very long term Science and the Management of Protected Areas provides a wealth of information on floral and faunal management global change research water quality human impacts and tourism It is the first book ever to bring together the perspectives of both environmental scientists and the administrative managers of protected areas and as such it will be useful to both the scientific community and to Land Managers **Yellowstone and the Snowmobile** Michael J. Yochim, 2009 The first scholarly study of winter use in any national park examines the history of the conflict between the National Park Service and various interest groups over snowmobile use in Yellowstone a highly politicized value driven battle that has taken a serious toll on the NPS's ability to protect the park **Annals of the American Academy of Political and Social Science** American Academy of Political and Social Science, 1910 *Yellowstone Science*, 2005 *The George Wright Forum*, 2006 **Northwest Science**, 1998 **Agroborealis**, 2009 America, History and Life, 2007 Article abstracts and citations of reviews and dissertations covering the United States and Canada **American Government**, 2001 This short inexpensive reader was created for the express purpose of combating student apathy toward the study of American government To engage students in the course material Professor Kidd has edited readings drawn from a variety of sources other disciplines the popular press that show students how the government is at work in all aspects of their lives The selections are prefaced by article summaries that focus student reading and include critical thinking questions that get students actively processing the material By presenting readings that make the study of government and politics relevant to students lives this unique new reader is sure to capture their interest and get them thinking about topics and issues in American government **Wilderness and Political Ecology** Charles Kay, Randy T. Simmons, 2002 Environmental law and

philosophy assume the existence of a fundamental state of nature Before the arrival of Columbus the Americas were a wilderness untouched by human hand teeming with wildlife and almost void of native peoples In Wilderness and Political Ecology Charles Kay and Randy Simmons state that this natural view of pre European America is scientifically unsupportable This volume brings together scholars from a variety of fields as they seek to demonstrate that native people were originally more numerous than once thought and that they were not conservationists in the current sense of the term Rather native peoples took an active part in managing their surroundings and wrought changes so extensive that the anthropogenic environment has long been viewed as the natural state of the American ecosystem

Landscape Planning and Ecological Networks Edward Cook, H. N. van Lier, 1994 Hardbound The ecological networks concept has been taken as a challenge in this sixth ISOMUL book Both the description of the background and of the contents of ecological networks are given as well as many examples of the use of the concept on the local and regional scale Finally a specific use of the concept of ecological networks for the national level The Netherlands and the International level E C is presented The volume will be invaluable to all those involved in the actual planning to safeguard and or restore natural and ecological values in the countryside and in specific green parts of urbanized areas
