The Exporters and Importers Trade Guide (succeeding the Exporters and Importers Credit Guide) and Standard Trademark Register ,1929 *The Official Railway Guide ,1889* **On Solov'yëv's View of Love and its Affinities with Proclus and Maximus the Confessor** Paraskevi Zacharia,2025-09-20 This dissertation explores the concept of love in the work of Russian philosopher Vladimir Solov'yev 1853-1900 with a focus on two of his writings *La Sophia* 1875-1876 and *Smysl lyubvi* The Meaning of Love 1892-1894. The author analyzes how the concept of Sophia wisdom as a feminine divine force and the idea of All Unity a universal all-encompassing unity converge in Solov'yev's deeper philosophical-theological vision of love. The study connects Solov'yev's ideas to those of the Neoplatonist Proclus and the Christian Church Father Maximus the Confessor. The central research questions are what is the relationship between love and Sophia in Solov'yev's thought and which Neoplatonic and Patristic elements influenced his conception of love. The author argues that *The Meaning of Love* does not explicitly mention the name Sophia but implicitly describes a Sophianic reality in which love fulfills a theurgical function. This reality has three dimensions philosophical, religious, mystical, and social. Through comparisons with Proclus and Maximus, the author shows how Solov'yev develops a unique integrative vision in which love leads to the unification of the individual, humanity, and the divine. This research offers an original approach to Solov'yev's thought with particular attention to mystical experience, metaphysical love, and the striving for wholeness. It fills a gap in the existing literature by systematically exploring the connection between love, Sophia, and the influence of Proclus and Maximus. Paraskevi Zacharia (1983) studied Classical Languages in Athens and later Russian. She obtained her PhD at Radboud University with a dissertation on Solov'yev's philosophy of love. She has published on theology, mysticism, and Neoplatonism, taught students, and presented internationally. She is an active member of various academic networks and received several fellowships, including OIKOS, the International Society for Neoplatonic Studies, the International Orthodox Theological Association, and the Mystical Theology Network.

This book, with its exciting depth and breadth, illuminates us about the history, practice and the very language of our subject about the role of abstraction, of proof and manners of proof about the interplay of fundamental intuitions about algebraic thought in contrast to geometric thought. The richness of mathematics and the philosophy encompassing it is splendidly exhibited over the wide range of time these volumes cover, from deep Platonic and Neoplatonic influences to the most current experimental approaches. Enriched as well with vivid biographies and brilliant personal essays written by and about people who play an important role in our tradition, this extraordinary collection of essays is fittingly dedicated to the memory of Chandler Davis, Reuben Hersh and Yuri Manin.

Barry Mazur, Gerhard Gade University Professor, Harvard University

This encyclopedic Handbook will be a treat for all those interested in the history and philosophy of mathematics. Whether one is interested in individuals from Pythagoras through Newton and Leibniz to Grothendieck, fields, geometry, algebra, number theory, logic, probability, analysis, viewpoints from Platonism to Intuitionism, or methods, proof, experiment, computer assistance, the reader will find a multitude of chapters that inform and fascinate.

John Stillwell, Emeritus Professor of Mathematics, University of San Francisco, Recipient of the 2005 Chauvenet Prize.

Dedicating a volume to the memory of three mathematicians, Chandler Davis, Reuben Hersh and Yuri Manin, who went out of their way to show to a broader audience that mathematics is more than what they might think, is an excellent initiative. Gathering authors coming from many different backgrounds but who are very strict about the essays they write, was successfully achieved by the editor in chief. The result, a great source of potential inspiration.

The Mathematical and Philosophical Legacy of Alexander Grothendieck Marco Panza,Daniele C. Struppa,Jean-Jacques Szczeciniarz,2025-01-21

Alexander Grothendieck is often considered one of the greatest mathematicians of the twentieth century if not all time and his unique vision continues to impact and inspire many fields and researchers today. Utilizing a multidisciplinary approach this edited volume explores the profound influence his work and ideas have had not only on mathematics but also on logic and philosophy. Chapters are written by international scholars and many were inspired by talks given at the conference Grothendieck A Multifarious Giant at Chapman University May 24-28 2022. Some chapters are written from a historical perspective and discuss the development of the main themes that characterized Grothendieck's work. Others are more mathematical in nature analyzing and extending some of his more relevant and obscure results that are still not well understood. Philosophical implications and applications in logic are the subjects of other chapters. This volume will be of interest not only to mathematicians working in algebraic geometry category theory and other areas to which Grothendieck contributed but also to philosophers logicians and historians of science
