Career Construction Jacobus Gideon (Kobus) Maree, 2020-06-29 This book sets out to provide context for innovating counseling for self and career construction. It gives readers insight into the theory underlying an innovative integrative qualitative quantitative approach to career counseling. Three key ideas recur throughout the book. First the idea of not dispensing advice to people instead enabling them to advise themselves. Second the idea of listening for instead of to people's stories to help them choose and construct careers and themselves and shape their career identities. Third the idea of helping people connect what they know about themselves consciously with what they are aware of subconsciously. The book confronts some of the main challenges posed by Work 4.0 on the workplace but also foreshadows the imminent advent of Work 5.0. It endeavors to promote career counselors ability to help people thrive at a time when many speculate that work itself is at risk. occupational contexts no longer hold workers in the way they used to and the coronavirus pandemic is disrupting the workplace

Health Anxiety and the Quest for Safety Márta Csabai, 2025-12-12 *Health Anxiety and the Quest for Safety* critically examines how psychological and sociocultural processes influence anxiety and safety seeking behaviour concerning perceived health risks in globalised information societies. It provides insights into how people respond to uncertainty and perceived threats to their body and health in the age of anxiety. In examining the history of health anxiety the author explores fluctuations in concepts highlighting the power dynamics uncertainties and biased social and scientific attitudes in the background. The chapters offer a critical analysis of contemporary safety seeking strategies including online health information searches fad diets self tracking body image interventions and the pursuit of personal meaning and well being. Additionally the book investigates how sociocultural influences can induce guilt about one's body and health promote self blame or foster stigmatising attitudes while emphasising how the emergence of psy culture pop psychology and digital tools may enhance health empowerment but also generate health related anxieties and deepen inequalities. As a critical reflection on prevailing individualistic paradigms the work also considers concepts that emphasise resonance and connectedness. This book is valuable reading for clinical and health psychologists critical social scientists researchers and students in the health sciences as well as practitioners in all healthcare settings psychotherapists and communication specialists

Health and Wellbeing Among Young People Maj Britt Dahl Nielsen, Susan Andersen, Sigurd Lauridsen, 2025-09-10. Mental disorders account for a large proportion of the disease burden in young people and poor mental health is strongly related to lower educational achievements and labor market attainment and other health problems including substance abuse, violence and poor reproductive and sexual health. Evidence suggests that the COVID 19 pandemic might have had a negative effect on young people's mental health and knowledge about secular trends in well being and mental health problems is important for planning public health interventions. Research on health promotion and preventive interventions remains scarce and the mental health needs of young people are often unmet and research is urgently needed to develop affordable and feasible interventions. In Denmark and other countries the mental health of young people has been declining especially in the wake of COVID 19. The main goal of this research topic is to further our understanding of trends in mental health and well being among young people and aid the development of feasible and effective public health interventions. This Research Topic welcomes empirical studies including qualitative, quantitative and mixed method research design papers and systematic reviews focusing on but not limited to the following sub topics: Trends in mental health and well being among young people, The impact of COVID 19 on mental health and wellbeing, New and emerging risks for mental health and well being for example related to online and mobile technology, Barriers to treatment, Development of affordable and feasible community based interventions, Implementation and effectiveness of preventive and health promotion interventions including universal interventions and interventions targeting vulnerable groups.
