

# PRODUCTIVITY

## Objectives:

- Follow safety practices
- Conserve materials
- Keep work area neat and clean
- Follow directions/procedures

## Follow Safety Practices

An important part of work ethics is following established safety practices. At our college, each classroom or lab has safety procedures. The same will be true on the job. Each department in each company will have a set of safety guidelines to which employees should adhere.

These rules are not designed to punish the student or employee, but rather to protect them. Safety is always important and is everyone's responsibility. The failure to follow safety rules can result in a lost-time accident or even death.

When a company experiences a "lost-time accident" due to the minor injury of an employee, everyone is affected. Efficiency and profits will go down with each minute lost. Co-workers will see an immediate effect if they are paid on a group incentive plan and a team member is injured. The effect may not always be as direct and may not always be as evident, but the fact remains that everyone suffers with injury.

Following safety rules will not totally eliminate "lost-time accidents," but their numbers will be cut down.

## Conserve Material

It's not your money that is going down the drain if you make a mistake and have to scrap part of the materials, is it? Think again—in the long term it may actually be your money or at least the continuation of your current paycheck.

One might say, "How will my employer ever miss the 500 sheets of paper and 100 staples that I wasted by duplicating the wrong information? That's not a lot of materials when you consider what we use every day!" Well, what would happen if your company has 100 employees and each one made a similar mistake? Or, what if we were talking about expensive chemicals instead of paper and staples?

Always use only the materials necessary to adequately complete your task. Treat the materials as if you were paying for them yourself. One of the best ways to cut down on scrap is to do the job right the first time and to always be conscientious. Scrap costs your company or your school money and decreases the profit margin. A decreased profit margin has a direct effect on employees because with less to go around, less will be given back to the employees.
