## 2026 Guide Mental Health Recovery:

*Promoting Recovery in Early Psychosis* Paul French, Jo Smith, David Shiers, Mandy Reed, Mark Rayne, 2010-03-04 There has been an extraordinary shift in how we understand and treat psychosis none more so than in the arena of Early Intervention EI bringing with it new hope for young people with emerging psychosis and their families. From the introduction to the book Centred around the Early Psychosis Declaration EPD this book explores the declaration's five themes through contributions from a sizeable number of mental health practitioners, service users, and carers. It is designed to help those working with people experiencing psychosis at an early stage of illness to develop and implement effective early intervention skills, enabling them to examine and refine their practice. Most importantly, the book is a practical guide to delivering early intervention strategies with a unique focus on recovery. Includes an abundance of case studies to link theory to practice. Evidence based. Edited by a team with a wealth of clinical and research experience. Suitable for qualified practitioners from all disciplines working in the Early Intervention field, including mental health nurses, psychiatrists, social workers, occupational therapists, clinical psychologists, and lecturer practitioners.

*Peer Support Work in Mental Health Services* Michael John Norton, 2025-09-22. Responding to a growing understanding surrounding the unique knowledge and skill set of individuals with lived experience of mental health conditions, this book responds to a gap in current literature by exploring the role of peer support work through the four realms of theory, research, policy, and practice, with a particular focus on mental health discourses. Filled with practical case studies and guidance on the most effective approaches to peer support work, chapters support readers in building their knowledge of: The theoretical models of peer work, including historical underpinnings, benefits and drawbacks, and the ontological epistemological basis for lived experience as a knowledge sub-set. The research behind the value of experiential knowledge models of peer support work, ethical dilemmas, and how peer support work relates to traditional mental health discourse. The policy developments in relation to peer support work. Peer support work in practice, including work with families, support work specialisms, and current guidance on best practice. A must-read for those working within mental health services, this book provides a comprehensive guide to peer support work for mental health professionals, programme managers, peer support workers, and service users.

continues to age impacting various aspects of the workplace. The rising percentage of older workers necessitates adaptations in job roles to accommodate the psychological, sensory, physical, and cognitive changes associated with aging. Concurrently, older workers must adapt to the dynamic nature of modern workplaces through continuous training and skill acquisition. Despite the valuable expertise and organizational commitment that older workers bring, studies on diversity management reveal persistent issues of ageism where older employees face negative discrimination. This underscores the need for a deeper understanding of how work history influences psychological well-being in aging individuals and how age affects performance, satisfaction, and occupational health. Current research in this area is limited and conceptually varied, highlighting the necessity for more comprehensive investigations. This research topic aims to explore the intricate relationship between aging and work, focusing on how an individual's work history impacts their psychological well-being as they age. It seeks to understand the influence of age on employee performance, satisfaction, and occupational health while also examining organizational strategies to prevent cognitive decline and combat age discrimination. Additionally, the research will investigate the benefits of work as a source of active, successful, and healthy aging. By addressing these questions, the research aims to provide actionable insights for policymakers and organizations to better support an aging workforce. To gather further insights into the complex interplay between aging and work, we welcome articles addressing but not limited to the following themes: Successful aging at work, Promoting employment opportunities for the aging workforce, Age diversity at work, Cognitive decline at work, Employment and cognitive reserve, Age discrimination in the workplace or ageism. These themes are not exhaustive and contributions that bridge multidisciplinary perspectives are especially encouraged. The research topic strongly supports both cross-sectional and longitudinal comparative studies involving diverse age groups or samples from later stages of life. This includes theory development, quantitative and qualitative empirical research, epidemiology research, and meta-analyses aimed at discovering new relationships or phenomena to inform modeling and advance the understanding of the psychology of aging and work.
