Pilgrims and Pilgrimages as

Peacemakers in Christianity, Judaism and Islam Antón M. Pazos, 2016-04-08 Pilgrimages can be analysed as acts of conflict such as the Crusades or also as platforms for relationship building and rapprochement between religions. With a set of contributions from leading experts in the field this book explores the concept of pilgrimage in Christianity, Judaism and Islam. Some specific examples of pilgrimages that helped to strengthen links between different religions or civilisations are explored, ranging from Europe to Asia and from the Middle Ages to the twentieth century. Even though every pilgrimage that is investigated here has helped to link different worlds the case studies show that this relationship rarely led to a better inter understanding. Nowadays peaceful coexistence seems to be its greatest achievement

The Future Is Ours Graham H. May, 1996-05-28 Why do we continue to think about, imagine and forecast the future despite believing we will probably be wrong? Why do we need to do so? What does the future mean and how do we relate to it? Is it possible that Western societies condition their members into inability to cope with the future? These and other fundamental questions are explored in The Future Is Ours which is written as an intermediate text for use in future oriented modules within BA courses in International Business Management, Urban Planning and Environmental Politics

The Decline Effect Dean Brooks, 2023-01-23 A crisis is coming for everyone who uses math and science. For decades now the classical model of probability, the indifference principle and the Gaussian distribution has been breaking down and revealing its limitations in fields from economics to epidemiology. Now a new approach has revealed the underlying non-classical principle behind all these anomalous laws: Pareto's law of elite incomes, Zipf's law of word frequencies, Lotka's law of scientific publications, Kleiber's law of metabolic rates, the Clausewitz-Dupuy law of combat friction, Moore's law of computing costs, the Wright-Henderson cost law, Weibull's law of electronics failures, the Flynn Effect in IQ scores, Benford's law of digit frequencies, Farr's law of epidemics, Hubbell's neutral theory of biodiversity, Rogers' law of innovation classes, Wilson's law of island biogeography, Smeed's law of traffic fatalities. The general

law behind all these particular laws and countless others is the decline effect As a system ages or grows in size the rules of probability subtly change Entropy increases rare items become rarer and average performance measures decline The human meaning of a decline may be positive decreasing costs falling epidemic mortality or negative lower customer loyalty decreasing efficiency but the mathematical pattern is always the same The implications are enormous as these examples show All epidemic diseases decline in infectiousness and in lethality HIV AIDS went from a highly infectious 95 percent fatal disease to a survivable condition with a latency of decades COVID 19 went from a death rate of 7 percent in early 2020 to under 2 percent in 2022 Hereditary dynasties around the world declined smoothly in lifespan from hundreds of years to tens of years When democracies replaced monarchies the decline in spans of party control continued **Future Survey Annual**,1995 **SF, the Year's Greatest Science Fiction and Fantasy**,1966 **The World's Work**,1915 **Computer Gaming World**,1993 **Spa Management**,1996 *The Year's Best S-F* Judith Merril,1966 *Handbook of International and Intercultural Communication* Molefi Kete Asante,William B.
